

BROMLEY 750

WHY DID WE MAKE THIS PRODUCT?

From history-making live shows to legendary listening sessions in the park, Marshall knows more than anyone how to harness the power of music to bring people together. To us, music really does make the world go round. This unique heritage, experience and knowledge was a driving force behind the design of Bromley 750. Our first-ever party speaker, made to dial up any and every social gathering to 11.

SPOKESPEOPLE QUOTES

HANNA WALLNER -
PRODUCT MANAGER

When we first considered entering the party speaker category, we saw an opportunity to bring something different to a uniform market. By staying true to our identity and what we are great at—prioritizing iconic design and superior acoustics—we've created a standout product that brings something fresh to an otherwise homogenous category.

ELLA RENNEUS -
SENIOR DESIGN MANAGER

We wanted to create a party speaker you won't want to hide away between parties. Instead, we designed Bromley 750 to be something you want to keep out and show off — a speaker that becomes part of your home and interior. The design is rooted in our heritage, with 'party' at its core. It's bold and straightforward, with every material chosen for a reason — to both look good and withstand countless parties to come. Inspired by stage lighting, we've incorporated lights in a new way, enhancing the atmosphere and elevating the entire experience.

NICOLAS PIGNIER DELAFONTAINE -
ACTING DIRECTOR OF ACOUSTICS

We wanted to create a powerful speaker that delivers great sound in multiple settings, whether that's powering a street party or bringing the vibes in the living room. Bromley 750 is capable of hitting high volumes whilst projecting True Stereophonic sound in all directions and for versatility, we've introduced the "character" knob. This feature empowers users to control the dynamics and tonal balance of their sound, effectively packing the characteristics of multiple different speakers into one single touchpoint.
